The tone and content of some of the commentators on the news articles is disgusting.

Yeah - not the quiet window that was planned. The event appears to have inevitable though based accounts of what little disturbance let it loose.

Anyway we're returning early and should be down there by Monday. We'll talk next week.

Thanks,
Steve

More stories about the unfortunate Gold King mine sludge release incident.

(The Gold King mine site is just a short distance up the canyon from where we have been working at the Red and Bonita mine site, to put in a plug to prevent this type of release. The Denver Post also carelessly included a few images of the Red and Bonita project in their photo gallery of the incident...)

And even in Utah, it's generating concern now, as the water heads down toward Lake Powell:
